Our College is doing an excellent job by promoting **Vermicomposting**, a sustainable and eco-friendly agricultural practice. By integrating this practice into the curriculum and encouraging active participation from **Zoology Department** students for fostering both environmental awareness and employability. The involvement of experienced Faculty members, such as **Dr. N.P. Meshram** and **Dr. A. V. Ramteke**, in providing hands-on training and theoretical knowledge adds great value to the initiative.

This focus on Vermicomposting not only benefits the students by equipping them with practical skills that can open doors to employment opportunities, but also help the local farming community by raising awareness about organic farming. By shifting from chemical-intensive farming to organic practices, are contributing to the improving health of the soil and the surrounding environment.

The efforts of the **Zoology Department** in implementing and promoting this practice are commendable, as vermicomposting has the potential to become a source of Additional income for rural families. It's a great example of how education can lead to positive change in local communities.
